Checks

Shadow Portal Admin Platform · Internal Use Only

This guide covers every screen, every request type, and every edge case in the Shadow Portal mobile app. Test with the 4 active companies below (V16 excluded — Odoo 16 instance unavailable). Each section includes exact employee credentials and a checkbox for each test case.

0 Employee Credentials

Company	SP Number	Employee	Barcode	PIN
energytracks	SP-00001	Jehad Hussain	19200002	2222
energytracks	SP-00001	Bashar Quraishi	19200003	3333

Company	SP Number	Employee	Barcode	PIN
energytracks	SP-00001	HANI YES	19200029	2929
Isec (V17)	SP-00002	AASEM AHMAD	45164705	4248
Isec (V17)	SP-00002	ABDALLA MOHAMED	74882741	4568
Isec (V17)	SP-00002	ABDULAZIZ ABDULRAHMAN	46131080	1365
Lavendary	SP-00003	Aadil Ali Shaikh	78800001	4444
Lavendary	SP-00003	Aadil Nazir	14100003	6666
Lavendary	SP-00003	Aadil Nazir	73800002	5555
Zahr (V15)	SP-00004	SHAHEZ	18200001	1111
Zahr (V15)	SP-00004	Mohammed	24600002	2222
Zahr (V15)	SP-00004	DAFER	03000003	3333

Barcode = Employee ID field shown at login. PIN = 4-digit numeric PIN set in Odoo.

1 Login & Onboarding

Test the company lookup and employee authentication flow for all 4 companies.

- Fresh install → company entry screen shows on open
- SP-00001 → "energytracks" name appears
- SP-00002 → "Isec (V17)" name appears
- SP-00003 → "Lavendary (V18)" name appears
- SP-00004 → "Zahr (V15)" name appears
- SP-99999 (fake) → "Company not found" error, no crash
- Jihad 19200002 / 2222 → logs into Dashboard
- Wrong PIN → error shown, stays on login screen
- Wrong barcode → error shown, no crash
- Lowercase sp-00001 → still works (case-insensitive)
- Login with one employee from each of the 4 companies
- Kill and reopen app while logged in → resumes session

2 Dashboard (Home)

Verify all dashboard cards load, animate, and navigate correctly.

- "Welcome back, [FirstName]" correct
- Current date shown at top
- Pending Approval card shows correct count
- IT + Maintenance card shows open ticket count
- Recent Activities list populates (or shows empty state)
- Each activity item tappable → Request Details

- Leave / Expense / IT / Maintenance pills all show numbers
- Tap Pending card → Search screen pre-filtered to pending
- Quick Actions: Time Off / Expense / Timesheet / More tappable
- Timesheet card shows entry count
- Pull-to-refresh works (spinner + data reload)
- + button top-right → New Request hub
- No white flash or light-mode panels
- Card animations play on load

3 New Request Hub

Confirm all 6 request type cards are visible and correctly coloured.

- Hub shows: Time Off, Expense, Attendance, Timesheet, IT, Maintenance
- All cards dark-mode correct (no white backgrounds)
- Back from any sub-form → returns to hub with form cleared
- IT Support greyed out if Odoo has no helpdesk module
- Tapping greyed IT card → warning toast, no crash

4 Time Off Request

Hub → Time Off. Test required fields, date pickers, and attachments.

- Leave types load from Odoo (spinner → pills)
- Select leave type → pill highlights
- "From" date picker opens and sets date
- "To" date picker opens and sets date
- Optional reason text field works
- Attachment picker works, file shows in list
- Submit with no leave type → warning toast
- Submit with no dates → warning toast
- Submit complete → success toast, returns to hub
- Request visible in Odoo back-office
- Test: Jehad (SP-00001)
- Test: AASEM (SP-00002)
- Test: Aadil Ali (SP-00003)
- Test: SHAHEZ (SP-00004)

5 Expense Claim

Hub → Expense Claim. Verify amount input, categories, and payment mode toggle.

- Amount field opens numeric keyboard
- Categories load as pill row
- Select category → pill highlights
- Paid By toggle: Employee vs Company both render
- Taxes row appears if Odoo has taxes
- Tax pills are multi-selectable
- Description field works
- Date picker works
- Submit with no amount → warning toast
- Submit with no category → warning toast
- Submit with no date → warning toast
- Submit complete → success toast, returns to hub
- Expense visible in Odoo
- Test: Bashar (SP-00001)
- Test: ABDALLA (SP-00002)
- Test: Aadil Nazir (SP-00003)

■ Attach a receipt (optional)

■ Test: Mohammed (SP-00004)

6 Attendance — Check-in/out Correction

Hub → Attendance → sub-type Check-in/out.

■ Check-in date & time picker works

■ Check-out picker works and is optional

■ Reason text field works

■ Attachment picker works

■ Submit with no check-in → warning toast

■ Submit with check-in only (no check-out) → success

■ Submit complete → "Attendance correction submitted!"

7 Attendance — Overtime

Switch sub-type to Overtime inside the Attendance form.

■ Date picker works

■ Overtime hours field is numeric (e.g. 2.5)

■ Optional reason text works

■ Submit with no date → warning toast

■ Submit with no hours → warning toast

■ Submit complete → "Overtime request submitted!"

8 Attendance — Absence Justification

Switch sub-type to Absence inside the Attendance form.

■ Leave types load in pill row

■ Select leave type → pill highlights

■ "From" date picker works

■ "To" date picker works

■ Justification text field is required

■ Attachment optional

■ Submit with no leave type → warning toast

■ Submit with no dates → warning toast

■ Submit with no justification → warning toast

■ Submit complete → "Absence justification submitted!"

9 IT Support / Helpdesk

Hub → IT Support. Only available if the company's Odoo has the Helpdesk module.

■ Subject field is required

■ Team selector pills load and deselect on second tap

■ Assigned To pills load and deselect on second tap

■ Priority stars: Normal/Important/Very Urgent/Critical

■ Ticket type pills selectable

■ Tags pills are multi-selectable toggle

■ Customer info section: Name / Email / Phone all optional

■ Screenshot attachment works

■ Submit with no subject → warning toast

■ Submit with subject only → success toast

■ Submit with all fields → success

■ Ticket visible in Odoo Helpdesk

■ Description multiline field works

■ No helpdesk on Odoo → card greyed, toast on tap, no crash

■ *IT Support may not be available on all 4 test companies — confirm which Odoo instances have the Helpdesk module installed.*

10 Maintenance Request

Hub → Maintenance. Test title, type toggle, optional selectors, and priority.

■ Title field is required

■ Description multiline optional

■ Type toggle: Corrective / Preventive both render correctly

■ Photo attachment optional

■ Category pills load (if configured), tap to select/deselect

■ Submit with no title → warning toast

■ Equipment pills load (if any), selectable

■ Submit with title only → success toast

■ Team pills (if configured)

■ Submit with all fields → success

■ Priority stars work correctly

■ Request visible in Odoo Maintenance

■ Scheduled date picker is optional

■ Test: Corrective type with HANI (SP-00001)

■ Duration hours field is numeric and optional

■ Test: Preventive type with AASEM (SP-00002)

11 Timesheet

Hub → Timesheet (or tap the Timesheet card on Dashboard). Two tabs: Log + History.

■ Projects load in pill row on Log tab

■ Submit with no hours → warning toast

■ Select project → tasks load in second pill row

■ Submit complete → success, entry appears in History tab

■ Select a task

■ History tab lists past entries

■ Date picker works

■ Pull-to-refresh on History works

■ Hours field is numeric (e.g. 3.5)

■ Each history entry shows project / task / hours / date

■ Description text optional

■ Test: DAFER (SP-00004)

■ Submit with no project → warning toast

■ Test: AASEM (SP-00002)

■ Submit with no date → warning toast

12 Search & Filters

Bottom tab → Search. All request types are queryable and filterable.

■ All requests from all types load by default

■ Date filter: This Month / Last Month work correctly

■ Type pill: Time Off → only time off shown

■ Filters combine (e.g. Expense + Pending)

■ Type pill: Expense → only expenses shown

■ Search bar keyword filters results in real time

- Type pill: IT / Maintenance / Timesheet each filter correctly
- Status filter: Pending → only pending requests
- Status filter: Approved / Rejected each work correctly

- Tap a result → Request Details opens
- No results → empty state shown, no crash
- Dashboard "Pending" card pre-fills status=Pending on Search

13 Request Details

Accessible from Dashboard, Search, and Notifications. Verify all request types.

- Time Off: leave type / dates / status / reason / attachments shown
- Expense: category / amount / date / description / payment mode / status
- Helpdesk: subject / team / priority / description / stage
- Maintenance: title / type / category / priority / stage
- Timesheet: project / task / hours / date / description
- Status badge renders correctly for all states
- Back button returns to previous screen

14 Notifications (Inbox)

Bottom tab → bell/inbox. Notifications are sent by the admin app push system.

- Notifications load grouped: Today / Yesterday / Earlier
- Unread count shown in header
- Unread items have blue highlight + bold text
- Tap notification → marks as read (highlight disappears)
- Notification with targetId → navigates to Request Details
- Notification without targetId → marks read only, no nav
- Pull-to-refresh reloads list
- Empty state ("You're all caught up!") renders correctly
- Approved notification shows green check icon
- Rejected notification shows red X icon

15 Profile

Bottom tab → Profile. Check employee info, menu items, and logout.

- Employee name and ID shown in header
- Gradient header renders in dark mode
- Settings menu item → navigates to Settings
- Security item is disabled / greyed out (coming soon)
- Help & Support → navigates to Help screen
- Log Out → confirmation modal appears
- Cancel in modal → remains logged in
- Confirm logout → company entry screen, session cleared

16 Settings

Profile → Settings.

- Screen loads without crash
- Notifications toggle: disable → no crash
- Notifications toggle: re-enable → no crash
- Back button works

17 Help & Support

Profile → Help & Support.

- Screen loads without crash
- Content renders correctly in dark mode
- Back button works

18 Session & Multi-Company Switching

Verify sessions are isolated and persist correctly across restarts.

- Login SP-00001 → logout → login SP-00002 → only SP-00002 data shown
- Kill app while logged in → reopen → session restored, no re-login
- Kill app after logout → reopen → company entry screen shown
- Submit a request → verify it appears in Odoo admin back-office

19 Edge Cases & Error Handling

Robustness checks — none of these should crash the app.

- No internet: submit any request → meaningful error shown
- Time Off for past dates → submits (Odoo decides approval)
- Expense amount = 0 → accepted or rejected gracefully
- Very long text in any text field → no overflow or crash
- Pick a large attachment file → UI does not freeze
- Rapid double-tap Submit → no double submission (button disabled)
- Wrong PIN 3 times → no lockout crash
- Dark mode consistent on every screen throughout

Quick Pass/Fail Checklist

Run through these after completing the full guide for a fast final sweep.

- SP-00001 login works (energytracks)
- SP-00002 login works (Isec V17)
- SP-00003 login works (Lavendary V18)
- SP-00004 login works (Zahr V15)
- Fake SP number → error, no crash
- Attendance overtime submits
- Absence justification submits
- Maintenance submits → appears in Odoo
- Timesheet entry logs → in History tab
- IT Support available on at least 1 company

- Wrong PIN → error, no crash
- Dashboard loads and refreshes
- Time Off submits → appears in Odoo
- Expense submits → appears in Odoo
- Attendance correction submits
- Search filters work
- Notifications load + mark as read
- Profile → logout → back to company screen
- Dark mode consistent on all screens
- No crashes throughout
